

WTF Are Nigger's Fearful Of?

by
YahZion EL

One of my favorite poems from the Last Poet, is "Niggers are afraid of Revolution".

The inner analysis of these brothers poem is really addressing fearfulness of a mind revolution. We have not live up to our ankestors with being about having a soulful mind resolution.

What is a soulful mind resolution? Simply, we must embrace the knowledge of the impossible, enhance our supernatural abilities and began to deprogram our minds. As Morpheus said to the One, you must free your mind. Forget about all that you have been taught by the European, the teachers and your parents. Change your perception of life and leave this thing called Life far behind.

Embracing critical thinking in a practical perceptive way, learn to conquer your behavior and fear. Develop serious courage, stand up for bravery, have a dedicated soulful heart, be willing to take a bold stance, seek the impossible in determination to free our minds my dear.

We must stand up, fight for what's right, be willing to bite the hand that's feed us, create a world of our own. No longer base our total existence on some else's life system and no longer talk that shit with our corrupted mind and our dirty mouth. When it comes down to it let our actions speak of our minds to make a positive change, let us be about doing something right without a doubt.

What the hell are we so afraid of today? Why are we so willing to follow the European way? Why have we not question our soulful truth-selves or make the impossible correction of ourselves in most truthful case. Why can we see that it is our time in the current age of transformation happening right in our face.

To be soulfully and mindfully free, to be highly spiritual and a divinely independent free thinking people will mean everything to overcome our fear. That time is now and all of us melaninated people must become soulfully mind free, for fear is the mind killer which can never be tolerated, It's our goal in life to eliminate our fear and like pure crystal water we must develop our third eye so that we can see our mind eye is very clear.
